Hand-Held Readers

General Description

Gryphon™ BT 100 and BT200 are two new members of the successful Gryphon™ mobile family. They share the same powerful architecture of the other models with a special addition: the latest innovation in the wireless communication, Bluetooth® technology. This technology provides the operator with wider mobility and no cable constraint. Bluetooth® is a standard defined worldwide, and it allows various devices manufactured by different companies to easily connect and communicate

The new Gryphon™ BT contains the Datalogic Bluetooth® radio module, which is compliant with the up-to-date Bluetooth® 1.1 standard and can communicate with any PC, Laptop, PDA, mobile phone, printer etc. that includes an embedded Bluetooth® module or an external commercial Bluetooth® dongle. The implemented Bluetooth® profile (i.e. the "protocol" used for communication) is provided by the SPP=Serial Port Profile: the Bluetooth® device is seen by the host like a virtual COM port.

Bluetooth® technology has been added to a first class scanner. Thanks to the stateof-art optics and a decode rate of 270 scans/sec, reading performance in terms of decoding capability and reading quickness makes the Gryphon™ BT very user friendly, intuitive and fast.

Furthermore, the "blue spot" produced by the Gryphon™ BT, provides "good reading" feedback directly on the code and makes the user's job easier, especially in noisy environments.

Features

- > Bluetooth® 1.1 compliant
- > Virtual COM and keyboard emulation data input
- > High speed data transmission: zero delay
- > RSS symbologies, PDF417 and linear bar code decoding
- > Package contents:
 - Gryphon™ BT
 - C- Gryphon[™] Battery Charger
 - CD-ROM Gryphon™ BT
 - Gryphon BT™ Quick Reference

Applications

- > "Cable replacement" for POS/In-Store
- > Document Handling
- > Shop Inventory Management

Connectivity

The introduction of Bluetooth® technology offers a wireless cost-effective solution when mobility is required. The Gryphon™ bar code reader can be connected to mobile computers, printers, mobile phones and other Bluetooth® compliant devices. The new Gryphon™ BT provides new application possibilities. A bar code reader can now be used, for example, in mobile shopping applications by simply transmitting data to a Laptop or a PDA.

Bluetooth® is a standard communication protocol that provides full connectivity between various devices. It guarantees quick and reliable communication and data transmission.
