The MS7220 ArgusSCAN™ is an aggressive omnidirectional laser bar code scanner ideal for retail, convenience, liquor, grocery and specialty stores. Because it is engineered with a large, high-speed scan area and a bright 650 nm laser, ArgusSCAN boasts exceptionally high first pass read accuracy for maximum productivity.

Offering four stand configurations, the ArgusSCAN is adaptable to a variety of applications. The modular design allows it to be mounted either horizontally or vertically, and a flexible post can be added, raising the scanner an additional 76 mm (3") off the counter top. Combine this with the MS7220's programmable depth of field, and the ArgusSCAN can be customized to meet the requirements of even

the most unique scanning environment.

Multiple interfaces and data parsing make the ArgusSCAN compatible with most cash registers right out of the box, and the RS232 auxiliary port allows for check readers, magstripe readers or bar code scanner input. Simply plug a Metrologic hand-held scanner into the auxiliary port for scanning bulky or heavy items.

The MS7220 ArgusSCAN is MetroSet® 2, MetroSelect® and MetroPOS® compatible, making configuration easy. And the MS7220's compatibility with Metrologic's PowerLink user replaceable cables allows users to quickly replace damaged cables.
